

Dip into something different.®

The
Melting Pot®
a fondue restaurant

January 27, 2014

Reference: Peter Baker and Grasp Lighting

To whom it may concern,

This letter is in regards to Grasp Lighting, owner Peter Baker, and the exemplary service, effort and product he provided for the recent renovation of The Melting Pot in Fort Myers, Florida.

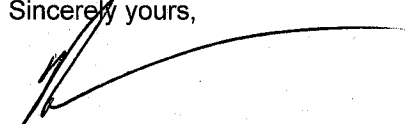

Peter offered the complete one stop shop. He meticulously reviewed the plans, itemized the needs, offered alternative suggestions to achieve a better result while saving money and time, then ordered and delivered the products promptly.

Peter's technical knowledge is impressive. He personally supervised the installation and was onsite to trouble shoot and resolve any issues, many times going above and beyond in his efforts.

Lighting is so important to the atmosphere of our concept. The pendants and the Toshiba LED bulbs in combination enhanced the tables and specifically the fondue pots by offering direct warm lighting. The LED color strips, the under-bar lighting, the tracks and spots Peter suggested and provided, have turned a dated restaurant into a new age piece of art. I plan on using Peter's expertise and services in all future restaurant projects.

If you have any questions or would like to discuss Peter and Grasp Lighting further, please do not hesitate to contact me personally.

Sincerely yours,

Bill Schmeierer, Owner
Melting Pot Restaurants
